What we do for you

WE TURN YOUR EXPERTISE INTO ACTION

REPRESENT

We defend the collective interests of our individual members by negotiating with the public authorities in order to make sure members can fully exploit their creativity and innovation.

EXCHANGE

We exchange knowledge and experiences on the challenges of running a digital company. Through member research we share the knowledge and we develop solutions for all members.

INSPIRE

We organise online & live meetups on digital topics so members can inspire members. We spread the expertise of our members to clients by putting their inspiring cases in the spotlights.

EDUCATE

We develop training sessions based on the needs of our members on management, legal, marketing and tech topics. We work with high schools to improve the digital talent of the new generation of students.
